WARNING

Eye and skin irritant. Avoid breathing dust. Avoid contact with skin, eyes, or clothing. Wash thoroughly with soap and water after handling.

KEEP OUT OF REACH OF CHILDREN.

"Texas Best" Professional Turf Food is formulated for Texas grasses for Spring and Summer application. The product contains Nitrogen, Phosphorus, and Potassium plus IRON and a micronutrient package. It is a combination of slow and fast release nitrogen, 50% of nitrogen available for immediate use by the grass and 50% of the nitrogen is released over 3 months. Also included in the formulation is a micronutrient package which includes Magnesium, Copper, Iron, Manganese, and Zinc. Each of these micronutrients, in conjunction with the macronutrients (NPK), are vital to having a healthy lawn. "Texas Best" Professional Turf Food improves the lawns ability to absorb water and nutrients and provides grass the nutrients needed to thrive during the harsh summer months. One bag covers up to 10,000 square feet.

N - Nitrogen makes grass green. Increases thickness, shoot density and sturdy growth to help fight off weeds and pests.

P - Phosphorus is used to encourage strong root growth and establishment. Beneficial with new planting and revitalizing established lawns.

K - Potassium is important in the synthesis of the grass components and increases the efficiency use of nitrogen by the grass.

COVERS UP TO 10,000 Sq. Ft.
50 lb. (22.68 kg)

Spring & Summer Fertilization

- Formulated For Texas Grasses
- Slow And Fast Release Nitrogen Plus Iron
- Feeds Up To Three Months
- Complete Micronutrient Package
- Improves Water and Nutrient Absorption
- Spring Application For Grass Green Up After Winter Months
- Summer Application Provides Nutrients Needed During Harsh Summer Months

Directions for Use: This custom formula has all the nutrients needed for a top quality lawn. Apply in early Spring at 5 lbs. per 1,000 square feet. The product will feed up to 3 months. To avoid fertilizer burn, never apply the fertilizer to wet grass and always water in after application. The middle spreader setting on most spreaders is calculated at 8-10 lbs. per 1,000 square feet.

Use On: St. Augustine, Bermuda, Zoysia, Centipede, Blue Grass, Carpet, Buffalo and more.
