We create chemistry

The Advance[®] family of ant baits. Because life happens.

Once ants find a food source around the home, they can be difficult to control. To help resolve this problem, BASF developed the **Advance** family of ant baits. Their desirable bait matrices are quickly accepted by a wide variety of ants. The active ingredients have delayed action, allowing workers to pass bait throughout the entire colony.

With its attractive bait matrices and flexible application options – including gel, granular baits, and bait stations – the **Advance** family of ant baits provides a full spectrum of control.

To manage ant colonies and maintain your customer's peace of mind, rely on the **Advance** family of ant baits as part of the Absolute Ant Control Solution.

- **Flexible:** Four different ant baits and three application methods provide you with the flexibility to control ants in different areas of the property.
- **Highly Effective:** The delayed action of the baits allows ants to make the trip between the bait and the colony, resulting in desired food sharing.
- **Attractive:** A variety of bait matrices will entice even the toughest-to-control species of ants when food preferences change with the seasons.

The Advance® Family of Ant Baits

Advance

Granular Carpenter Ant Bait

A.I. 0.011% Abamectin B₁
Packaged 8 oz., 2 lb.

- Premier carpenter ant bait
- Large grit size with proprietary blend of attractants

Advance 375A

Granular Ant Bait

A.I. 0.011% Abamectin B₁
Packaged 8 oz., 2 lb.

- Universal ant bait formula with a unique blend of proteins and carbohydrates
- Contains a mix of grit sizes that can be picked up and taken by many species of ants

Advance 360A Dual Choice

Ant Bait Stations

A.I. 0.011% Abamectin B₁
Packaged 4 box/case; 18 pk/box

- Professional ant bait station with two different bait matrices in each station
- Contains a protein blend and carbohydrate/oil blend in separate compartments
- Packaged in child-resistant container
- Perfect for pharaoh ants

Advance 388B

Ant Gel Bait

A.I. 5.4% Borax
Packaged 5 box/case;
4 x 30 g reservoirs/box

- The convenience of a gel that's attractive like a liquid
- Borax, a natural ingredient, poses a low risk
- Applied indoors and outdoors in areas where ants travel, hide, or nest, like the cracks and crevices in windows, door sills, water pipes, and door jambs

Flexible to Fit All Situations

With the **Advance** family of ant baits, you have different options to control ants both indoors and out. **Advance** granular carpenter ant bait and **Advance 375A** granular ant bait can be used around termite bait stations, in ant bait stations or as a perimeter, mound or broadcast treatment. **Advance 360 Dual Choice** ant bait stations can be placed along walls, baseboards, under sinks, and around appliances. And, since ants forage vertically, **Advance 388B** ant gel bait can be applied on vertical surfaces in or around the home.

Highly Effective

As social insects, ants live in colonies. The Advance family of ant baits use the social behavior of ants - specifically food sharing - to eliminate the entire colony.

Attractive

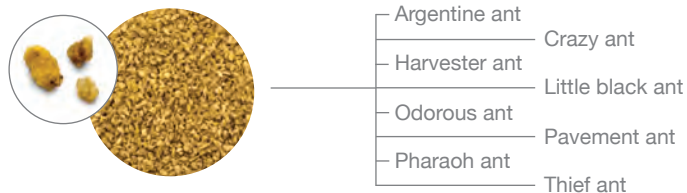

The **Advance** family of ant baits provides attractive bait matrices that will appeal to different species of ants, including problematic Argentine and crazy ants. Ant baits are a practical option for people, too - they pose less risk to children and pets due to limited exposure and precise application.
