5725

HOW CAN WE HELP?

Armadillo Scram is a proprietary blend of natural & biodegradable ingredients specifically designed to reduce and eliminate armadillo activity. Our all-natural repellent contains a blend of more active ingredients that make it stronger than other repellents using just castor oil. While

Armadillo Scram is fast acting, it may take a few days for armadillos to leave the treated areas. Armadillo Scram is both all natural and biodegradable and will naturally break down over time.

Makers Of America's Finest™ Granular Repellents

**GRANULAR REPELLENT
PROFESSIONAL**

HOW DOES IT WORK?

Armadillo Scram Professional repels armadillos and alters their environment in two ways:

- Food tastes bad and their digestive system is disturbed.
- Tunnels & surrounding soil become bad-smelling.

WHAT YOU SHOULD KNOW

Armadillos normally come from neighboring property. Carefully examine your property before applying Armadillo Scram. Check garden areas, concealed spots along structures, fence lines and landscape to find where the animals may have burrowed in addition in the visible damage in your lawn and beds.

Focus on Peak Application Times

Armadillos are active throughout the year. Apply at the first sign of intrusion or damage.
