General Information

BRANDT CONVERGE SRN 18-0-6 brings it all together in one highly efficient, foliar nutritional product. The fully chelated micronutrient package can be taken up either by foliar or soil absorption. The unique blend of ingredients provides quick greening to turfgrasses without rapid top growth.

Rate Recommendations

For professional use only, apply twice a month as a foliar spray early in the morning or late in the day for best results. Allow foliar sprays to dry thoroughly before irrigation to insure even foliar uptake.

For Warm or Cool Season Turfgrasses:

Maintenance: 4 fl oz per 1,000 sq ft or 1.25 gal per acre [12 L per hectare].

Renovation: 6 fl oz per 1,000 sq ft or 2 gal per acre [19 L per hectare].

Overseeding: 8 fl oz per 1,000 sq ft or 2.5 gal per acre [25 L per hectare], applied at least semimonthly after seeds have begun to germinate. Most effective when used as part of an overall overseeding nutritional program.
