Use at the rate of 6-10 ounces per 100 gallons of spray solution.

Brandt Big Foot W. S. B.

Water Soluble Bags

Just drop the bag in the spray tank, and that's all! No measuring and no containers to dispose of! Use one water soluble bag with each 50-100 gallons of spray solution. Mix chemicals according to manufacturer's recommendations, add BRANDT BIG FOOT WSB to the spray tank last, then agitate.

Brandt Big Foot Tablets

Pre-Measured Water Soluble Tablets

Specifically designed to effectively mark small volume spray solutions such as backpack, pump-up, knapsack or other small application tanks.

Thoroughly dissolve 1 tablet to each 1-2 gallons of spray solution to be marked. Charge tank with half the water required, then add the desired number of tablets and continue filling. Tablets should thoroughly dissolve on their own, however some agitation will speed the process.

Wear rubber gloves and eye protection.

Avoid contact with skin or eyes. In case of eye contact, flush with large amounts of water and consult a physician. If skin contact occurs, wash with soap and water.
