

Turfstone

Concrete Grid Pavers

Turfstone grid pavements allow vegetation to thrive even in the most heavily trafficked walkways. Ideal for pedestrian and overflow traffic areas requiring solid traction and/or erosion control. Turfstone blends perfectly with the landscape. Its simple open weave design allows for a breathable pavement, making it an environmentally friendly alternative to heat-producing concrete or asphalt surfaces.

Benefits of Turfstone:

- Open lattice grid design for turf infill
- 40% surface opening with void space for creating a grass pavement
- Applications include driveways, parking stalls, ramps, service and emergency access lanes
- Manufactured in accordance with ASTM C1319

Typical Detail:

NOTE: Commercial vehicular applications should utilize a 6" wide concrete curb for containment.

Colors:

Grey
