Concentrate

9-7-9

Promotes deep rich leaf  
color, strong roots and  
more beautiful blooms

Feed every  
time you  
water

# BONIDE LIQUID ORCHID FOOD 9-7-9

## DIRECTIONS FOR USE

Apply only as directed. SHAKE WELL BEFORE USING. Do not store diluted product. Ideal for feeding all of your orchids each time you water. Mix 1/8 tsp. into one quart of water. Approximately 10 drops (or 1 brief squirt). If you feed your Orchids once or twice a month, use 1/4 tsp. per quart of water.

## ORCHID FERTILIZING TIPS

- Do not use water that has passed through water-softening units on your orchids. Such water may contain high amounts of sodium that can be harmful to orchids.
- When orchids are actively growing, fertilize them.
- Very dark green leaves that are succulent and floppy can be a sign of overfertilizing.
- If the orchids are diseased or in poor condition, stop fertilizing.
- Drench the potting material, several times in a row, every few weeks or so with fresh water that contains no nutrients to wash out any excess fertilizer salts.

### Guaranteed Analysis 9-7-9

Total Nitrogen (N).....	9%
2% Ammoniacal Nitrogen	
7% Urea Nitrogen	
Available Phosphate (P <sub>2</sub> O <sub>5</sub> ).....	7%
Soluble Potash (K <sub>2</sub> O).....	9%

Derived from Urea, Ammonium Polyphosphate and Muriate of Potash.
