

# ETGE

et  
g a g e  
e n c l o s u r e

The Calsense ET Gage Enclosure, model ETGE, is a vandal-resistant enclosure used primarily as a protective cover for the ET Gage. The ETGE offers peace-of-mind that your ET Gage won't be damaged from tampering, vandalism, or animal interference.

The enclosure base post is made from #16-gauge 304 stainless steel on which the ET Gage, model ETG is mounted using the mounting bracket that comes with the ET Gage. The body assembly is manufactured from 5-inch diameter 304 stainless steel tubing. The mesh screen at the top which keeps pests off, is 16-gauge (AWG) 2.25-inch stainless steel. The T-handle assembly is manufactured from 5/8-inch round 304 stainless steel. Customer provided locks are used with T-handles to prevent the enclosure from being removed by unauthorized personnel.

The enclosure cover is simple to remove to service the ET Gage.

## technical specifications
