

FITTINGS & TUBING

1/4" Dripline

Available with multiple options for dripper spacing, DIG's 1/4" dripline provides a quick and simple solution for installing a drip system. Each cylindrical dripper is pre-inserted and has two holes to help prevent clogging. The dripline is designed for fast installation and ease of use.

model	description			
SH50	1/4" dripline black	.5 GPH	12" SPACING	50' LENGTH
SH112	1/4" dripline black	.5 GPH	12" SPACING	100' LENGTH
SH109	1/4" dripline black	.5 GPH	9" SPACING	100' LENGTH
SHB106	1/4" dripline brown	.5 GPH	6" SPACING	100' LENGTH
SHB109	1/4" dripline brown	.5 GPH	9" SPACING	100' LENGTH
SHB112	1/4" dripline brown	.5 GPH	12" SPACING	100' LENGTH

Porous Soaker Hose

Porous soaker hose provides full saturation along the length of the line and can be used in short lengths for watering planter boxes, narrow plantings and vegetable gardens, or it can be looped or circled around trees.

PSH50	porous soaker hose black	50' LENGTH

Drip Soaker Tape

Drip soaker tape is a flat, thin-walled hose, containing pre-spaced drip emitters, that expands when the system is turned on and pressurized with water. In-line drip emitters, welded into to the drip soaker tape every 12" during the extrusion process, allow for complete saturation coverage along the line. The tape is ideal for drip irrigation of vegetable gardens and row crops.

model	description		
ST100R	drip soaker tape	100' LENGTH	12" SPACING .6 GPH
ST500	drip soaker tape	500' LENGTH	12" SPACING .6 GPH
