

EverGreen™

PROFESSIONAL ICE MELTER

Just throw...and go!

When Old Man Winter unleashes his annual storms of snow and ice, safety catapults to priority one status in both commercial and residential environments. Diligent use of EverGreen™ Professional Ice Melter is one way to help promote safety and reduce risk during and after precipitation events.

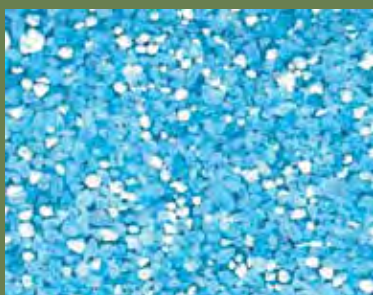

Works
Down To
-25°C

This proprietary blend contains unique ingredients for fast melting action.

As EverGreen™ is spread on top of snow and ice, the safety color coating makes it easy for people to identify treated areas, giving them increased peace of mind by providing proof positive that an ice melter is in use. Because of its high visibility, users tend not to over-apply the product, reducing financial costs and environmental impact.

Trilingual Packaging (English/French/Spanish)

Powder Blue
Safety Coating

50lb. Poly Bags (49 per pallet)
UPC #6 74532 55650 4
