

Sticky-Stripe™ / Orange Stripe™ Algae Resistant PVC Flex Hose - The same great GPH A/R Flex PVC hose with an industry first easy melt welding stripe built in! Solvent welding PVC is such a common practice in the irrigation field that it can be taken for granted... until a poor weld causes a system failure. Our proprietary catalyst in the orange stripe melts at a lower temperature with a lower viscosity; ensuring a better weld compared to standard hose using the same welding technique.

**P-70 Primer with IPS-795 PVC Solvent Cement recommended for Schedule 40 fitting connections**

## Features

- Sticky Stripe™ technology helps ensure a better weld
- Constructed from durable, UVR, S-0214 non-rigid PVC blend materials
- Orange stripe makes hose easily identifiable after installation
- Available in 4 different sizes: ½" Irrigation Size (¾" IPS), ½" IPS, ¾" IPS and 1" IPS
- Kink resistant
- Can be installed at or below grade
- PVC Tubing is compatible with schedule 40 slip fittings of the corresponding size when welded or "glued"

Part Number <small>Add coil length in feet to end of Part #</small>	Avail. Coil Lengths	OD	ID
GPVCSSAR050IRR	500 ft	0.680"	0.500"
GPVCSSAR050IPS	100, 200 ft	0.840"	0.560"
GPVCSSAR075IPS	200 ft	1.050"	0.750"
GPVCSSAR100IPS	100 ft	1.315"	1.000"
