LIQUID

FOR:

- Increased Resistance To Fungal & Bacterial Pathogens
- Reduced Water Loss by Cuticle Transpiration
- Increased Plant Mechanical Strength - Rigidity

GUARANTEED ANALYSIS

Silicon AS SiO_2 7.5%

Soluble Potash (K_2O) 3.0%

Derived from Mono-silicic Acid
and Potassium Silicate.

CAUTION :

KEEP OUT OF REACH OF CHILDREN

Alkaline Material - Avoid contact with eyes and skin.

NUTRITIONAL SUPPLEMENT

•
FOLIAR SPRAY

•
FERTIGATION

DIRECTIONS

FOLIAR : Mix 4 Pints SILO-TEC in 100 gallons of water (450 cc per 380 liters of water). Apply as a full coverage spray. SILO-TEC is compatible with most commonly used fungicides and pesticides. However, prior to using previously untried mixes, we recommend performing a compatibility jar test.

For smaller areas:

Turfgrass - use 4 to 6 ozs. in 10 to 20 gals. of water per 1,000 sq. ft.

Nurseries & Greenhouses - use 4 to 6 ozs. in sufficient water for full coverage spray, minimum 20 gallons of water.

FERTIGATION : Depending on plant's stage of growth and requirement, use 1 quart of SILO-TEC per 1,000 gallons of water (900 cc to 3.7 liters SILO-TEC per 3,785 liters of water).

Net Wt.: 1 Liter 12x1 Liter
