

- 01 **Versatile:** 34 nozzles and 6 body choices
- 02 **Durable:** Tough factory-installed rubber cover
- 03 **Adjustable:** 50°-360° arc setting with easy through-the-top adjustment

I-20 ROTORS

Diverse and Efficient to Meet Any Need

Whether you've got a small area, sandy soil, or a mix of shrubs and grass, the I-20 is ready to water with efficiency and reliability. With 34 nozzle choices, a 17' to 46' radius, and six body choices, the I-20 is an indispensable rotor. Recent improvements include automatic arc return; non-reversing, adjustable arc from 50° to 360°, and a non-strippable, vandal-proof drive mechanism. Optional pressure-regulated bodies will take incoming pressures of 50-100 PSI and reduce them to 45 PSI, saving up to 25 percent more water. Additional features like FloStop® control, easy through-the-top arc adjustment, and a standard drain-check valve make the I-20 rotor top in its class.

Nozzle Racks

Large selection of nozzles to meet the needs of the most complex landscapes.

Easy Adjustable Arc

Simple through-the-top adjustment allows fine tuning of the coverage area.
