NOTE: Termite stations (wooden stakes, or pop-up termite detection stations) are to be placed in the ground by professional pest control operators and used to indicate that termites are active in the area. Whenever termites are detected, professionals can use registered products for termite control.

The application does not require digging a trench to apply the product due to its highly penetrant nature. Species, HydroTrail™ applications are best applied in the early spring through summer months, or at other times of termite foraging activity.

STORAGE: Store in a well-ventilated place. Keep container tightly closed. Store locked up.

DISPOSAL: Dispose of contents/container in an approved waste disposal plan.
