JET BLUE ICE FIGHTER

SmartMelt™ Technology is the third generation advanced engineered blend of polyols, organic salts and bio additives encapsulating a non-organic chloride. This blend offers the greatest ice melt capacity, lowest corrosion and overall performance like no other branded granular de-icer in its class. It was developed with the same patented technology used by commercial airports and military bases all over North America and UK. Find out how our SmartMelt Technology products can enhance your winter de-icing needs by improving performance and reducing costs.

Suitable for both commercial and residential driveways, porches, sidewalks and steps, JetBlue is pet-friendly and won't track inside or stain.

Number	Size	Pack	Pallet Qty	Pallet Wt.
0601919	50lb Bag	pallet	49	2550lb

71%

Less corrosive than commercial road salt.

SHRP 205.1

Ice melt capacity tested by third party labs to exceed all claims.

-22°

Our products melt ice below -22° Celsius.
