## Just imagine the possibilities...

---

A backyard sanctuary to relax and recharge, a gathering space to entertain family and friends, a stunning driveway and walkways to make a great first impression... every day Keystone Hardscapes helps turn dreams like these into realities.

At Keystone Hardscapes, we are committed to providing unrivaled product selection, quality and customer service. Since the 1980s, our products have been installed in thousands of residential and commercial properties. Our innovative and versatile paving, wall and outdoor living elements continue to be favorites of homeowners, contractors, designers and developers alike.

Keystone Hardscapes is where beauty and functionality meet; where outdoor dreams come to life.

Locally made products, nationally trusted brand. No need to put off until tomorrow what we can build together today. Trust us to help transform your residential or commercial property.

# GRASSTONE™ I

Grasstone I, made with an open-void, interlocking lattice design, creates a flat surface for intermittent paving applications. The open void allows for on-site infiltration of stormwater or revegetation. Designs can use topsoil or aggregates in the grid openings depending upon desired effect. The Grasstone I concrete grid stone reinforces grassy areas that are subject to intermittent wheeled light vehicular traffic.

# ADA Detectable Warning Paver

The ADA Detectable Warning Paver is an additional guidance provision for wheelchair and pedestrian access to streets, sidewalks and other components of the public right of way. This product will help ensure local jurisdictions and other entities that their facilities are accessible to people with physical or sensory disabilities. The ADA Detectable Warning Paver provides visual as well as textural contrast to conventional publicly utilized pavements.

# BROADSTONE® 6" & 8" - Medley

BroadStone's beautiful rough hewn texture and bold, natural stone-like appearance will impress contractors and homeowners alike. Both will be impressed with not only its aesthetic, but also its ease of construction. From the stability of the integral lug connection, sidewalls that align vertically for easy corefill and the near vertical batter, it is easy to see that BroadStone has the contractor in mind when designing this show stopping block.

# REGAL STONE PRO® - RockFace

A full one-square-foot face complemented by a natural texture makes the Regal Stone Pro - RockFace a beautiful addition to any landscape. Behind the handsome, rugged exterior is a hollow core that lightens the unit for easy handling and installation. Rear lip installation and engineering innovation make Regal Stone Pro the right choice for even the most challenging wall designs.

# REGAL STONE PRO<sup>®</sup> - RockFace 3-pc

Regal Stone Pro - RockFace 3-pc brings the latest look and appeal in architectural design with its addition of the two smaller modular components. The three-piece system separates itself by creating alternating scale and dimensions. While the system still meets the rigorous demands for both engineering and structural components, its multiple shape patterning creates new and innovative applications for site work designs.

# REGAL STONE PRO® - Tri-plane

The Regal Stone Pro - Tri-plane takes retaining wall construction to a higher level. Architects, engineers, and contractors are choosing this stone to create flexible, cost-effective solutions for a broad range of large commercial, municipal, and residential retaining wall projects. With the rear lip design and a larger facial profile, construction, alignment, and setback are facilitated.

# KEYSTONE® ASHLAR 8/6

The Keystone Ashlar 8/6 system combines two popular products with great aesthetic and functional results. The panels are a quick way to build a multi-height wall by combining the Regal Stone Pro - RockFace 3-pc and the Harington 3-pc wall systems in a simple installation pattern. The Keystone Ashlar 8/6 installation pattern is quick to install on any scale when you want to create a random, rough-hewn look without sacrificing productivity.

### REGAL STONE PRO - RockFace 3-pc

		HEIGHT	WIDTH	DEPTH	WEIGHT	UNITS/PALLET	PALLET WT.	FACE FT./PALLET	BATTER	PRODUCT NO.
Bundled	Small	8"	7"	12"	38 lbs	16	2,688 lbs	32	7.1°	#835
	Medium	8"	11"	12"	50 lbs	16				
	Large	8"	18"	12"	80 lbs	16				

### HARINGTON 3-pc

		HEIGHT	WIDTH	DEPTH	WEIGHT	UNITS/PALLET	PALLET WT.	FACE FT./PALLET	BATTER	PRODUCT NO.
Bundled	Small	6"	6"	12"	28 lbs	20	3,300 lbs	30	10.6°	#876
	Medium	6"	12"	12"	53 lbs	20				
	Large	6"	18"	12"	84 lbs	20				

## Estimating Information

### 1) Determine the square footage of exposed wall.

- Each panel covers 3.5 sq. ft. Divide the square footage of exposed wall by 3.5 to determine the number of panels.
- Each pallet of Regal Stone Pro - RockFace 3-pc can complete 16 panels. Divide the number of panels by 16 (rounding up) to determine the number of Regal Stone Pro - RockFace 3-pc pallets required.
- Each pallet of Harington 3-pc can complete 20 panels. Divide the number of panels by 20 (rounding up) to determine the number of Harington 3-pc pallets required.

### 2) Determine the linear footage of base course, and divide by the appropriate factor below to calculate the amount of material required.

- Harington 3-pc = 60 linear feet per pallet.
- 18 inch only blocks: 1.5 linear feet per block.

### 3) Add the exposed wall and base course requirements. Don't forget the caps!

Colors printed here are as true a match as the printing process will allow. For best matching results, please refer to actual samples.

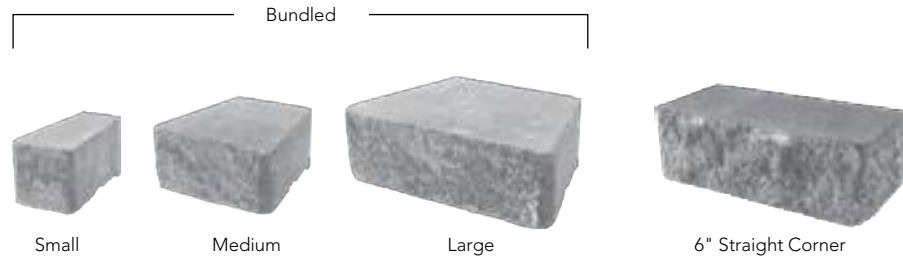

# HARINGTON® 3-pc

The Harington 3-pc retaining wall system evokes the texture and look of natural stone, making a striking architectural statement. The hand-hewn facing creates a stone-like appearance while the rear lip eliminates setback and alignment issues to speed construction. Available in blended earth tone colors, these retaining wall units are a reliable, easy-to-install alternative to natural stone walls.

# RUMBLESTONE® COLLECTION

Reminiscent of our fondest childhood toys, the innovative RumbleStone collection provides a set of rustic building blocks for your outdoor hardscape projects. Whether your project is simple or complex, large or small, RumbleStone's possibilities for creative expression are as limitless as your inner child's imagination. The six tumbled RumbleStone sizes can be assembled in an endless variety of configurations and orientations. In addition to simple running bond patterns, the stones can be easily stacked with insets, moved forward and backward, horizontally and vertically, for more aesthetically pleasing visual relief and texture. What will you create?

# ACCESSORIES

Contact Your Local Representative for availability on the full line of QUIKRETE® products such as bagged concrete mixes, concrete repair products, and masonry products.

## Commercial Grade Polyurethane Construction

**Adhesive** - High performance, commercial grade adhesive designed for permanently bonding concrete, brick, marble, stone, wood, glass, aluminum, steel, PVC and tile.

Use For: Repairing broken concrete • Bonding retaining wall block and caps

## Geogrid

Geogrid is geosynthetic material used to reinforce soils and similar materials. Geogrids are commonly used to reinforce retaining walls, as well as sub-bases or subsoils below roads or structures. Soils pull apart under tension. Compared to soil, geogrids are strong in tension.

## Filter Fabric

Filter Fabric is a geotextile having a primary function of allowing water to pass while keeping soil fines from migrating through the fabric.

Geogrid

Filter Fabric

Choosing interlocking paving stones for your home is an investment that needs to be protected. Surebond Joint Stabilizing Sealer does just that by bonding joint sand and sealing the pavement surface. Bonding joint sand maintains the structural integrity of the system – stones won't move, sand won't wash out, and weed and ant problems are reduced, all while sealing the surface to protect it from oil, salt and food staining as well as maintaining the natural color of the stone.

Features & Benefits of SB-1300 and SB-7000 Water-Based Sealers and Joint Sand Stabilizers:

- Immediate Application - The ONLY sealers that can be applied IMMEDIATELY after paver installation.
- Coverage - An average of 100 sq ft / gallon and lasts 3 to 5 years indoors and outdoors, on old and new pavements, concrete, clay, and natural stone paving.
- UV-Resistant - Will not yellow.
- Breathable - Will not trap naturally occurring efflorescence.
- Resists freeze/thaw damage and will improve surface durability.
- Solvent-free - Meets or exceeds all VOC and EPA standards.
- Maintains joint sand height, reducing weed growth.
- Maintains horizontal friction by bonding the sand between units.

Features & Benefits of SB-5000 STAINBLOCKING SEALER:

- Protective - Resists a wide variety of penetrants including water and oil.
- VOC-compliant - 50 g/l and safe to use.
- Environmentally friendly - Water-based product will not harm plants or surrounding landscape.
- Invisible - Does not change the appearance of the substrate.
- UV-resistant and stable - Does not yellow in sunlight and protects substrate from fading.

## Polymeric Sand

Polymeric Sand is a precise mixture of polymer binders and clean natural sand. Polymeric Sand will bond with the pavers / stones adding strength to the joint as well as reliability to the pavement system. It is ideal for use on any paver surface such as sloping areas, driveways, patios, pool decks, sidewalks, etc.

Use For: Driveways • Sidewalks • Pool Decks • Patios

## COLOR VARIATIONS

As in all natural materials, color in paving stones and wall stones has inherent variations. Paver and wall color is affected by the variances in the raw materials, concrete mixture, moisture content, climactic conditions, and other variations. Therefore, the colors shown are approximate representations of paver and wall colors, but should not be expected to be an exact match of what will be delivered.

## THE NATURE OF EFFLORESCENCE

Another cause of color variation in paving stones and wall stones may be the natural phenomenon called efflorescence. Efflorescence, a deposit of white salts consisting of mostly calcium carbonate, may appear as a white powder on the paver or wall surface and in no way affects the structural integrity. This phenomenon occurs in all concrete and although it cannot be completely prevented from occurring, efflorescence generally will weather off and disappear over time or can be removed with cleaners at the job site.

QUIKRETE and its subsidiaries (collectively QUIKRETE) reserve the right to improve its products and make changes to its specification and design without notice. The information contained herein has been compiled by QUIKRETE and to the best of its knowledge, accurately represents Keystone Hardscapes products and how it may be used in the applications which are illustrated. Site conditions, including load pressures acting on the wall, soil types and drainage conditions, may vary. Final determination of the suitability of the product for the use contemplated and the manner of product use are the sole responsibility of the user. Good construction practices and local building codes require the use of an engineered design when constructing retaining walls or free-standing walls in many conditions. Structural design and analysis should be provided by a qualified engineer.
