

HydroCover™ – #089760

Cellulose with Tack

Shoots well while providing excellent coverage...

Advantages:

- Exclusive defibration and manufacturing processes improve water-holding capacity by 22%
- Pre-blended with 3% polymer tackifier to increase protection from seed washout and erosion
- Eliminates the extra step and mess of field-mixing tackifier
- Provides erosion control that is superior to straw for approximately the same cost — ideal for general seeding
- Darker and richer green color than competing brands gives your work a more professional look from the very beginning
- Non-toxic, environmentally safe and biodegradable
- Maximum slope length of 20 feet
- Can be used in all types of hydraulic seeding equipment
- HydroCover™ Cellulose with Tack functional longevity is ≤ 3 months

Composition:

Cellulose Fiber – 85% \pm 3%
 Polymer-based Tackifier – 3% \pm 1%
 Moisture Content – 12% \pm 3%
