GENERAL INFORMATION

LESCO[®] MSO is a combination of highly-refined, modified soy oil and selected emulsifiers. It is designed to be used with herbicides that suggest or require the use of MSO on the label. Because of its oily nature, LESCO MSO dissolves into the waxy cuticle, carrying the active ingredient with it. This allows the active ingredient to reach the inside layer of the plant more readily, where it is carried to the rest of the plant to do its job more reliably.

- Modified seed oil is derived from natural soy bean oil - Better performance than petroleum oils, unmodified soybean oils or nonionic surfactants

- Only spray applications delay evaporation - Remains on target weeds longer for improved uptake

DIRECTIONS FOR USE

NOT FOR AQUATIC USE

If the pest control product calls for or allows the use of an MSO, follow the instructions on the pest control product label. Care should be used on sensitive species as the product could increase sensitivity to light.

If the applicator does not have experience with a specific tank mixture and/or the combination of products being used is not recommended by the pest control label, a compatibility (jar) test and a phytotoxicity test should be run before using the product.

MIXING INSTRUCTIONS

Always follow instructions on the pesticide label.

If instructions are not provided, follow these general instructions: Fill spray tank 2/3 or 3/4 full of water. Add dry flowables (DF) and wettable powders (WP) disperse thoroughly. Continue the addition of other active ingredients, then adjuvants including LESCO MSO.

Note: Tank mixtures including LESCO MSO should be utilized within 36 hours for best results.

USE RATES

Low volume sprays, less than 1/2 gal. per 1,000 sq. ft.: If the label allows the use of an MSO but does not recommend a rate, add one (1) oz. per 1,000 sq. ft. of LESCO MSO to the spray tank. Extra product may be needed on weeds with heavier wax cuticles, under dry or dusty conditions, or for more mature weeds. High volume sprays, 1/2 gal. per 1,000 sq. ft.: Use of this product at rates less than in the chart below will cause a lack of control due to inadequate amounts of MSO. Providing an effective amount of LESCO MSO is essential in achieving the goal of pest control. Use the lowest effective dose from the chart below if the total volume sprayed is 20 gal. or more per acre.

Pesticide	Type % v/v	Desiccants	0.5 -1 %	Miticides	0.0625 - 0.125%
Herbicides	0.5 -1 %	Insecticides	0.0625 - 0.125%	Sprayer Type	
Defoliant	0.5 -1 %	Fungicides	0.0625 - 0.125%	Backpack, Small Tanks, etc.	1/2 oz./gal. of finished

All uses must not exceed 5% v/v of total spray solution

STORAGE AND DISPOSAL

STORAGE: Store in a cool well-ventilated place. Keep in original container tightly closed. Do not reuse empty container. Do not store with food, feed, or other material to be used or consumed by humans or animals. Do not contaminate water supplies. For optimal storage, store between 40° and 90° F.

DISPOSAL: Do not contaminate water, food or feed by storage or disposal. Dispose of contents in container to an approved waste disposal facility in accordance with all federal, state and local regulations. Triple rinse (or equivalent) adding rinse water to application tank. Offer container for recycling or dispose of in a sanitary landfill or by other procedures approved by local regulations. The Agricultural Container Recycling Council (ACRC) operates the national recycling program. To contact your state and local ACRC recycler visit the ACRC web page at www.acrcycle.org.
