GENERAL INFORMATION

Conform is formulated with sequestering and complexing agents to condition water of unknown quality and should be used whenever the active ingredient label calls for the addition of ammonium sulfate (AMS) to the tank mix.

Conform is recommended for use with tank mixes that combine weak-acid herbicides such as glyphosate, with growth regulator herbicides such as 2,4-D, and other active ingredient mixtures.

Does not antagonize glyphosate and helps to prevent alkaline hydrolysis.

Conform is easier to handle, transport and store than dry AMS. Blends quickly for reduced mixing and loading times.

Contains ammonium sulfate (AMS).

Conform does NOT contain oil or surfactant, but is compatible with these products.

DIRECTIONS FOR USE

Not For Aquatic Use.

Follow the directions on the most restrictive label of the tank mix partners.

Tank mixtures should only be applied within the label recommendations of every product in the tank mixture.

Use only if a water conditioning agent containing ammonium sulfate (AMS) is allowed or not excluded on the label.

Use only with herbicides that allow lower pH conditions. Do not use with copper containing active ingredients.

If the user does not have experience with the mixture being applied, perform a jar test using the order and amounts in the mixture and perform a phytotoxicity test to ensure crop safety.

Order of addition

In general, follow the W-A-L-E-S plan when adding herbicides to a tank mix.

1. Wettable powders (WP) then flowables (F, DF)
2. Agitate then add anti-foaming compounds.
3. Liquid and soluble products
4. Emulsifiable concentrates (EC)
5. Conform or other adjuvants
