DESCRIPTION

LESCO Tracker Green is a non-hazardous indicator dye added to spray tank mixes to properly identify areas covered with the spray pattern to improve accuracy in applying expensive fertilizers and/or pesticides. The dye is non-toxic, water soluble and will not stain. The temporary color disappears with rain, dew, irrigation or sunlight. This product is inert and will not react with commonly used tank mix products.

GENERAL INFORMATION

LESCO Tracker Green is not for use on food crops. It is not recognized or regulated as a pesticide by the Office of Pesticides and Toxic Substances of the U.S. Environmental Protection Agency according to 40 CFR 180.1001 for use on non-crop vegetation.

DIRECTIONS FOR USE

LESCO Tracker Green is a green spray indicator dye which is added to the tank after all products have been mixed. It will not affect the performance of turf fertilizers and/or pesticides. This dye is completely water soluble and disperses quickly in agitated tanks.

RECOMMENDED APPLICATION RATES: TURF

Add LESCO Tracker Green to the spray tank at a rate of 0.2 to 0.4 oz. per 1,000 sq. ft. or 8 to 16 oz. per acre.

The lower rate can be used on greens-height turf. Longer grass will require higher than recommended rates.

For backpack or hand sprayers, add 2 to 3 oz. to 3 to 5 gallons for spot treatment applications.
