

LESCO® SEED STARTER 3

MULCH WITH TACKIFIER

SUPERIOR PERFORMANCE IN ALL SEEDING APPLICATIONS

Hand | Drop Seeder | Hydroseeder

- Enhanced Germination
- Can Be Used On Moderate Slopes, Up to 3:1
- Made With Recycled Paper And Corn Fiber
- Reduces Evaporation
- No Clean-Up
- Biodegradable
- Provides Weed-Free Straw Alternative
- Reduces Runoff
- Easy Loading Into Hydroseeding Tank
- Dark Green Color

THE SMART CHOICE OF TURFGRASS PROFESSIONALS

PRODUCT STATEMENT

Seed Starter 3 comprised of a unique blend of paper, corn fiber and plantago tackifier. This unique form allows for hydraulic seeder, drop spreader, and hand applications. Once seed and fertilizer have been applied (with drop spreader or by hand) according to recommended rates, this product should be spread evenly over the prepared seed bed. To maximize seed performance, seed must have good seed-to-soil contact and be kept from drying out after seed germination. Use a quality LESCO® starter fertilizer to achieve best results. After applying LESCO® Seed Starter 3 by hand or using a drop spreader, water must be applied to hydrate mulch pellets. The pellets will hold up to four (4) times their weight in water, allowing protection for the seed from drying out. Increased application rate in case of limited watering frequency should not exceed a 2x rate.

TECHNICAL DATA	
Organic Content	>99%
Moisture Content	10% (+/-2%)
Color	Green
Water Holding Capacity	>400%
Specific Adhesive Strength	500
Weight	50 lb./bag
COVERAGE RATES	
Flat	65#/1000 ft. ²
<4:1 Max Length 30 ft.	70#/1000 ft. ²
>4:1<3:1 Max Length 25 ft.	75#/1000 ft. ²

Hydroseeder Application

Seed Starter 3 should be mixed with water in a hydraulic seeding machine at the rate of 50 lb. of fiber per 125 gallons of water. The product can be used in both jet and paddle agitated machines and should mix in the tank for a minimum of 10-15 minutes prior to application.

Drop Spreader Application

Seed Starter 3 is applied at a rate of 50 lb. per 750 sq. ft. and can be made using a LESCO® 36" drop spreader with the special ½" fixed bottom. Water treat area sufficiently to expand pellets once application is complete. The easy-to-apply pellets absorb rainfall or irrigation water rapidly, expanding to provide increased surface coverage.

Application by Hand

Easy application can be made by filling a bucket with Seed Starter 3 and spreading by hand to fill thin and small bare areas. Apply one bag to cover 750 sq. ft. surface area. Pellets absorb rainfall or irrigation rapidly, expanding to provide increased surface coverage.
