8-2-2

ORGANIC TREE, SHRUB AND EVERGREEN STAKES

GUARANTEED ANALYSIS

Total Nitrogen (N)8%
8% Water Insoluble Nitrogen
Available Phosphate (P205) 2%
Soluble Potash (K20)..... 2%

DERIVED FROM: Feather Meal, Bone Meal, Sulfate
of Potash

ALSO CONTAINS NON-PLANT FOOD INGREDIENTS

SOIL AMENDING GUARANTEED ANALYSIS

ACTIVE INGREDIENTS

Bacteria

Bacillus pumilus 140,000 CFU/gram
Bacillus megaterium 140,000 CFU/gram
Bacillus subtilis 140,000 CFU/gram
Bacillus licheniformis 490,000 CFU/gram
Bacillus amyloliquefaciens 490,000 CFU/gram

Endomycorrhizae

Glomus intraradices 0.03 propagules/gram
Glomus aggregatum 0.03 propagules/gram
Glomus mosseae 0.03 propagules/gram
Glomus etunicatum 0.03 propagules/gram

Ectomycorrhizae

Rhizopogon villosulus 5.0 propagules/gram
Rhizopogon luteolus 5.0 propagules/gram
Rhizopogon fulvigleba 5.0 propagules/gram
RhizoPOGon amylopogon 5.0 propagules/gram
Pisolithus tinctorius 200.6 propagules/gram
Scleroderma citrinum 10.9 propagules/gram
Scleroderma cepa 10.9 propagules/gram
/CFU = Colony Forming Units/

DIRECTIONS FOR USE:

- If soil is dry, water thoroughly before inserting.
- Use three (3) stakes for every two (2) inches (5.0 centimeters) diameter of tree trunk measured at chest height.
- With plastic driving cap, tap stakes into ground, spaced evenly at tree's dripline. (Dripline is directly below the ends of the tree's longest branches.)
- When stake is even with ground, remove cap and continue to tap stake to at least two (2) inches (5.0 centimeters) below soil surface. Use of protective eyewear is suggested. Note: Never insert stakes closer than two (2) feet (60 cm) from tree trunk. If dripline is less than 2 feet, insert at 2 feet from trunk.
- Best results are obtained with three yearly applications: spring, mid-summer and fall.
- Store in dry place and use soon after purchase.

Net Weight 18.18 kg (40 lb.)
