Moisture Manager™

professional root zone moisture management

Patented Hygroscopic and Humectant Technology Plus 15% Renewable Resource Non-Ionic Surfactant

Composition: 50% Humectants (sugar alcohols, polysaccharides and neutral salts of alphahydroxypropionic acid), 15% Non-Ionic Surfactant, 35% Inert Ingredients.

Moisture Manager combines patented hygroscopic technology with an advanced, renewable resource, non-ionic surfactant for improved soil penetration and enhanced performance. Moisture Manager is only beneficial within the root zone and therefore must be watered in thoroughly after application. Moisture Manager is biodegradable - reapply every 3 months or as needed.

DILUTION: Moisture Manager is a concentrated formula designed for large scale applications. Dilute with water before applying. Minimum dilution rate 15:1 (water to Moisture Manager). Moisture Manager May be tank mixed or applied through injectors and fertigation systems.

APPLICATION:

TURF: General application rate - Apply 9 oz. of Moisture Manager per 1,000 sq. ft. (3 gallons per acre) by spray or drench once every 3 months or maintain monthly at 1/3 rate after initial full rate application. For best results apply to wet soil. Water in with at least 1/10 inch of water within the first couple of hours to insure Moisture Manager is washed off foliage and into the soil. Within 24 hours, follow with enough additional water to carry Moisture Manager down to and throughout the root zone. (The amount of additional water required to carry Moisture Manager throughout the root zone is dependent on the depth of the root zone of the treated area.) Additional Moisture Manager may be required to correct difficult and extreme dry spot areas.

WETTING AGENTS AND PENETRANTS: Moisture Manager contains an excellent soil surfactant designed specifically to allow penetration through thatch layers and hydrophobic soils, driving Moisture Manager down to and throughout the root zone where it is designed to function.

SEEDING, OVERSEEDING, SODDING, SPRIGGING & HYDROSEEDING: Apply Moisture Manager at the general application rate of 9 oz. per 1,000 sq. ft. by spray or drench after seeding, sodding or sprigging. Water in with only enough water to rinse Moisture Manager off foliage and into the soil at seed level or the root area of new sod or sprig. An application of Moisture Manager made prior to overseeding, sodding or sprigging and watered into the root zone will manage soil moisture for existing turf during new turf establishment. For Hydroseeding applications, mix in tank.

TREES, SHRUBS & INDIVIDUAL PLANTS: Dilute Moisture Manager at a rate of 2 oz. per gallon of water and apply by drench thoroughly saturating the root zone. For maximum effectiveness on trees apply 1 to 2 ounces of concentrate for each 1/4 inch of trunk diameter. Dilution rate is variable from 50:1 to 300:1

POTTED OR CONTAINERIZED PLANTS: Dilute Moisture Manager at a rate of 2 oz. per gallon of water and apply by drench, thoroughly saturating the planting media. Media should be dry enough to hold as much diluted Moisture Manager as possible. Moisture Manager may be applied through existing injectors at rates between 50:1 and 100:1. Higher dilution rates may require multiple applications to achieve desired results.

LARGE PLANTERS & GARDENS: Dilute Moisture Manager at a rate of 2 oz. per gallon of water or through injectors at a rate of 50:1 to 100:1 and apply at a rate of 2 ounces of concentrate per 60 sq. ft. of area. One gallon treats 4,000 square feet.

FOR BEST RESULTS: Water thoroughly when re-watering Moisture Manager treated plants. Proper fertilization will enhance Moisture Manager's effectiveness.

Moisture Manager is biodegradable. For maximum effectiveness reapply every three months or when required watering becomes more frequent. Reapply if a reduction in watering is not apparent within the first two weeks.

CAUTION: If Moisture Manager is applied to open flowers blooms, rinse with water plain water to reduce possibility of the Moisture Manager pulling moisture from sensitive flower petals.

WARRANTY: LESCO, Inc. warrants that this product conforms to the analysis on its label. When used in accordance with label directions, under normal conditions, this product is reasonably fit for its intended purposes. Since time, method of application, weather, plant and soil conditions, mixture with other chemicals, and other factors affecting the use of this product are beyond our control, no warranty is given concerning the use of this product contrary to label directions or under conditions which are abnormal or not reasonably foreseeable. The user assumes all risks of any such use.

Moisture Manager is manufactured in the United States under one or more of the following U.S. Patent Numbers 5814123, 5865869.

#088755 NOT A PLANT FOOD INGREDIENT NET CONTENTS: 55 gal. (208.2 L)
