

LESCO®

Moisture Manager™

professional root zone moisture management

**Patented Hygroscopic and Humectant Technology
Plus 15% Renewable Resource Non-Ionic Surfactant**

Composition:

50% Humectants (sugar alcohols, polysaccharides and neutral salts of alphahydroxypropionic acid), 15% Non-Ionic Surfactant, 35% Inert Ingredients.

Moisture Manager combines patented hygroscopic technology with an advanced, renewable resource, non-ionic surfactant for improved soil penetration and enhanced performance.

Moisture Manager is only beneficial within the root zone and therefore must be watered in thoroughly after application.

Moisture Manager is biodegradable - reapply every 3 months or as needed.

NOT A PLANT FOOD INGREDIENT
