

LESCO®

ALL PRO TEAM MATES PLUS MIX

TURF-TYPE TALL FESCUE, PERENNIAL RYEGRASS, AND KENTUCKY BLUEGRASS

Highest Germination Rate | Advanced Testing | Unparalleled Standards

FEATURES

- Advanced generation cultivars
- Dark green color
- Heat and drought tolerant
- Excellent traffic tolerance
- Fast establishment
- Good disease and insect resistance

AGRONOMIC CHARACTERISTICS

All Pro Team Mates Plus Mixture will provide a durable, traffic tolerant turf that will withstand heat, drought and low maintenance. The addition of turf-type perennial ryegrass will aid in quick establishment and recovery. The addition of Kentucky bluegrass will add fine texture and density to the turf as well as recovery in damaged turf areas. Team Mates Plus is suitable for sun and partial shade conditions. Team Mates Plus is especially suited for athletic fields, parks, lawns, roadsides and utility areas.

SUGGESTED USAGE

All Pro Team Mates Plus Mix is suitable for golf course roughs, home lawns, athletic fields, commercial turf areas, parks and playgrounds, particularly where irrigation is limited.

TURF ESTABLISHMENT GUIDELINES

Adequate seed bed preparation is important in new turf grass establishment as well as in overseeding applications. Check soil pH and apply LESCO starter fertilizer prior to seeding. Cool-season grasses germinate best in the 60° to 85° F (16° to 30° C) soil temperature range. Frequent light irrigation and/or seed starter mulch is required for optimum germination. Germination should be visible within 14 days; complete turf establishment will take three to six months to exhibit mature growth characteristics.

RECOMMENDED MAINTENANCE PRACTICES

Highest quality and durability are reached using moderate maintenance levels. Allow turf to establish prior to heavy use. Mowing height at 2-3" is recommended (lower mowing heights require higher maintenance).

ENVIRONMENTAL TOLERANCE

All Pro Team Mates Plus Mix is suitable for permanent turf in the cool humid and cool arid zones along with higher elevations in the warm arid and warm humid zones.

INGREDIENTS

70% Tall Fescue
(3 Varieties)
20% Perennial Ryegrass
10% Kentucky Bluegrass

SEEDING RATES

New Establishment

6-8 lbs./1000 sq. ft.

Renovation

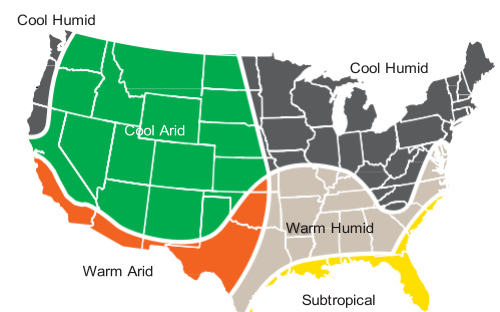

20-50% existing cover
5-7 lbs./1000 sq. ft.

50-75% existing cover
4-6 lbs./1000 sq. ft.

PACKAGING INFORMATION

50 lb. bag
#20-09-250
50 lb. bag Opti-Root Treated
#20-09-253
10 lb. bag
#083295

Woven Polypropylene Bags
