

LESCO®

SUN & SHADE PARK MIX

TURF-TYPE PERENNIAL RYEGRASS, KENTUCKY BLUEGRASS,
AND FINE FESCUE

Highest Germination Rate | Advanced Testing | Unparalleled Standards

FEATURES

- Advanced generation cultivars
- Moderate to low maintenance
- Good for full to moderate shade
- Quick establishment
- Rich green color and fine texture
- All-purpose turf mixture

AGRONOMIC CHARACTERISTICS

Sun & Shade Park Mix forms a durable turf for general use areas. This mix will perform well under a wide range of maintenance levels and can be established in full sun to partially shaded conditions. Sun & Shade Park Mix will provide turf with a fine texture, good mowing quality, and withstand moderate traffic. Sun & Shade Park Mix will establish quickly for maximum competition against annual weeds.

SUGGESTED USAGE

Sun & Shade Park Mix is suitable for parks, cemeteries, commercial turf areas and home lawns. Sun & Shade Park Mix can be used for renovation and repair of existing lawns, and is an excellent product for hydroseeding.

TURF ESTABLISHMENT GUIDELINES

Adequate seed bed preparation is Important in new turf grass establishment as well as in overseeding applications. Check soil pH and apply LESCO starter fertilizer prior to seeding. Cool-season grasses germinate best in the 60° to 85° F (16° to 30° C) soil temperature range. Frequent light Irrigation and/or seed starter mulch is required for optimum germination. Germination should be visible within 21 days; complete turf establishment will take six to eight months to exhibit mature growth characteristics.

RECOMMENDED MAINTENANCE PRACTICES

Highest quality and durability are reached using moderate maintenance levels. Allow turf to establish prior to heavy use. Mowing height at 1 1/2" to 2 1/2" is recommended (lower mowing heights require higher maintenance).

ENVIRONMENTAL TOLERANCE

Sun & Shade Park Mix is adapted throughout the cool arid and cool humid zones.

INGREDIENTS

34% Kentucky Bluegrass
33% Perennial Ryegrass
33% Creeping Red Fescue

SEEDING RATES

New Establishment:

3-4 lb./1000 sq. ft.

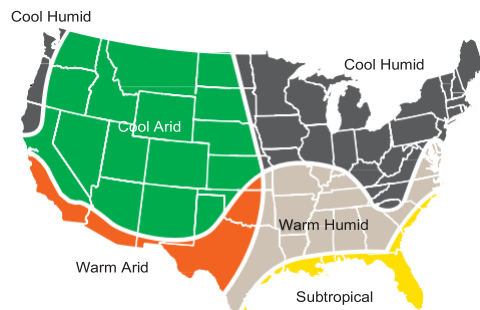

Renovation:

20-50% existing cover
2-3 lb./1000 sq. ft.

50-75% existing cover
1.5-2 lb./1000 sq. ft.

PACKAGING INFORMATION

50 lb. bag
#20-80-250
25 lb. bag
#20-82-250
10 lb bag
#025727
50 lb. bag Opti-Root Treated
#20-80-253
Woven Polypropylene Bags
