

CONSERVATION 2 MIX

PERENNIAL RYEGRASS, ANNUAL RYEGRASS, KENTUCKY BLUEGRASS, CREEPING RED FESCUE AND WHITE CLOVER

Highest Germination Rate | Advanced Testing | Unparalleled Standards

FEATURES

- Improved cultivars of Perennial Ryegrass and Kentucky Bluegrass
- Moderate to low maintenance
- Good for full sun to moderate shade
- Quick establishment
- Excellent for erosion control
- Improved fine texture
- Medium green color

AGRONOMIC CHARACTERISTICS

Conservation 2 Mix is designed for applications where durability, quick establishment and erosion control are important. Conservation 2 Mix is good for full sun to moderately shaded conditions. Conservation 2 Mix can tolerate a wide range of soil conditions and maintenance practices. This mix is excellent for all purpose applications including parks and commercial areas along with non-irrigated areas and slopes.

SUGGESTED USAGE

Conservation 2 Mix is suitable for parks, cemeteries, and low maintenance sites. This mix can be used for renovation and repair of existing turf and is an excellent product for hydroseeding.

TURF ESTABLISHMENT GUIDELINES

Adequate seed bed preparation is important in new turf grass establishment as well as in overseeding applications. Check soil pH and apply LESCO starter fertilizer prior to seeding. Cool-season grasses germinate best in the 60° to 85° F (16° to 30° C) soil temperature range. Frequent light irrigation and/or seed starter mulch is required for optimum germination. Germination should be visible within 14 days; complete turf establishment will take three to six months to exhibit mature growth characteristics.

RECOMMENDED MAINTENANCE PRACTICES

Highest quality and durability are reached using moderate maintenance levels. Allow turf to establish prior to heavy use. Mowing height at 1/2" to 2 1/2" is recommended (lower mowing heights require higher maintenance).

ENVIRONMENTAL TOLERANCE

Conservation 2 Mix is adapted for medium to low maintenance turf areas in the cool humid and cool arid zones of the United States.

INGREDIENTS

40% Perennial Ryegrass
30% Annual Ryegrass
20% Creeping Red Fescue
5% Kentucky Bluegrass
5% White Clover

SEEDING RATES

New Establishment:
4-5 lb./1000 sq. ft.

Renovation:
20-50% existing cover
3-4 lb./1000 sq. ft.

50-75% existing cover
2-3 lb./1000 sq. ft.

PACKAGING INFORMATION
50 lb. bag
#20-81-250
Woven Polypropylene Bags
