Frequently Asked Questions

Q. How does Mosquito Free work?

A. The cedar oil acts as a pheromone interruption agent that impairs their mental capacity and is the residual repellent for up to 30 days depending on saturation. The cedar also causes the insects exo-skeleton to dehydrate. The fatty soap acts as a sticker to the insect.

Q. How often should I apply Mosquito Free?

A. Every 30 days depending on infestation and saturation. If you are spraying for mosquitoes we recommend that you spray first application then return in 15 days for second application. Then resume to every 21- 30 days.

Q. Is Mosquito Free harmful around children or animals?

A. Mosquito Free is not harmful to humans and domestic animals when mixed with the proper ratio of water stated on the label. Yards can be used with in a minimum of 30 minutes or more of drying time.

Q. What are the storage requirements for Mosquito Free?

A. Store in a cool, dry location away from sunlight and heat source. Keep out of reach of children and animals. Do not store below 32 degrees.

Q. How much Mosquito Free product per sq.ft. or acre should I be spraying?

A. A gallon of ready to use should cover approx.1000 sq.ft. An acre can use 25-45 gallons or more of ready to use product depending on saturation with a tank sprayer. This is an average of suggested use. No more than 100 psi. Back pack/mist spraying is more for residential use providing mist spraying instead of saturation and uses anywhere from 7-10 gallons of ready to use product.
