

# FAIRWAY 50/50 MIX

TURF TYPE KENTUCKY BLUEGRASS AND PERENNIAL RYEGRASS:  
BLUE TAG CERTIFIED

Highest Germination Rate | Advanced Testing | Unparalleled Standards

## FEATURES

- Advanced generation cultivars
- Premium turf quality
- Excellent traffic tolerance
- Excellent disease resistance
- Close mowing under high maintenance
- Blue Tag Certified Mixture

## AGRONOMIC CHARACTERISTICS

Fairway 50/50 Mix is designed for golf course fairways and other areas where premium turf can be mowed as closely as 1/2". All varieties in this mix have excellent NTEP scores for genetic color, density, establishment and traffic tolerance. This particular mixture of Kentucky Bluegrass and Perennial Ryegrass shows better rooting and recovery on compacted soils than all bluegrass blends.

## SUGGESTED USAGE

Fairway 50/50 Mix is well suited for athletic fields, golf course tees and fairways, and premium commercial areas and home lawns.

## TURF ESTABLISHMENT GUIDELINES

Adequate seed bed preparation is Important In new turf grass establishment as well as in overseeding applications. Check soil pH and apply LESCO starter fertilizer prior to seeding. Cool-season grasses germinate best in the 60° to 85° F (16° to 30° C) soil temperature range. Frequent light Irrigation and/or seed starter mulch is required for optimum germination. Germination should be visible within 21 days; complete turf establishment will take six to eight months to exhibit mature growth characteristics.

## RECOMMENDED MAINTENANCE PRACTICES

Highest quality and durability are reached using moderate maintenance levels. Allow turf to establish prior to heavy use. Mowing height at 1/2 to 2 1/2" is recommended (lower mowing heights require higher maintenance).

## ENVIRONMENTAL TOLERANCE

Fairway 50/50 Mix is well adapted for cool humid and cool arid zones as well as in higher elevations in the warm humid zone.

## INGREDIENTS

50% Kentucky Bluegrass  
(2 Elite Varieties)  
50% Perennial Ryegrass  
(2 Elite Varieties)

## SEEDING RATES

### New Establishment:

3-4 lb./1000 sq. ft.

### Renovation:

20-50% existing cover  
2-3 lb./1000 sq. ft.

50-75% existing cover  
1.5-2 lb./1000 sq. ft.

## PACKAGING INFORMATION

50 lb. bag  
#20-51-413  
Woven Polypropylene Bags
