

# 90/10 TALL FESCUE KENTUCKY BLUEGRASS SOD MIX

SOD QUALITY TALL FESCUE AND KENTUCKY BLUEGRASS MIX

# Highest Germination Rate | Advanced Testing | Unparalleled Standards

#### **FEATURES**

- · Advanced generation cultivars
- · Attractive dark green color
- · Heat and drought tolerant
- Wear tolerant
- · Dense upright growth habit
- Meets sod quality requirements
- Zero Crop | Zero Weed
- Triple Tested

### **AGRONOMIC CHARACTERISTICS**

90/10 Tall Fescue Kentucky Bluegrass Sod Mix offers three lower growing, fine textured, dense turf-type tall fescues that feature an attractive dark green color. Superior seedling vigor and improved tolerance to heat and drought stress allow this mix to perform well in a broad range of soil types from very acidic to moderate alkalinity. The Shamrock Kentucky Bluegrass blends well with the turf-type tall fescues and provides both added tensile strength and disease resistance.

# **SUGGESTED USAGE**

Sod farms, golf course roughs, athletic fields, home lawns, commercial turf, parks and playgrounds are all suitable utilizations of this mix particularly where irrigation is limited.

# **TURF ESTABLISHMENT GUIDELINES**

Adequate seed bed preparation is Important in new turf grass establishment as well as in overseeding applications. Check soil pH and apply LESCO® starter fertilizer prior to seeding. Cool-season grasses germinate best in the 60° to 85° F (16° to 30° C) soil temperature range. Frequent light irrigation and/or seed starter mulch is required for optimum germination. Germination should be visible within 14 days; complete turf establishment will take two to three months to exhibit mature growth characteristics.

# **RECOMMENDED MAINTENANCE PRACTICES**

Highest quality and durability is reached using moderate to high maintenance levels. Allow turf to establish prior to heavy use. Mowing at 2" to 3" heights is recommended (lower mowing heights require higher maintenance).

# **ENVIRONMENTAL TOLERANCE**

This mix is best adapted to the cool arid and cool humid regions of the US along with high elevation areas in warm humid regions.

#### **INGREDIENTS**

90% Tall Fescue (2-3 Sod Quality Varieties) 10% Shamrock Kentucky Bluegrass

### **SEEDING RATES**

New Establishment: 250 lb./acre

# **PACKAGING INFORMATION**

50 lb. bag #30-14-880

Woven Polypropylene Bags Oregon Certified Blend
