

BRITTANY 2

CHEWINGS FESCUE

Highest Germination Rate | Advanced Testing | Unparalleled Standards

FEATURES

- Dark green color
- Excellent Spring Green up
- Shade tolerant
- Traffic tolerant
- Fine textured
- Upright growth habit

AGRONOMIC CHARACTERISTICS

Brittany 2 produces a fine textured dark green turf. Brittany 2 blends well with other fine fescues, as well as Perennial Ryegrasses, Tall Fescues, Kentucky Bluegrass and native grasses. Brittany 2 has shown good mowing quality, traffic tolerance and excellent seedling vigor. Brittany 2 is suitable for low maintenance turf as well as high maintenance turf. Brittany 2 has shown resistance to prevalent turf disease such as Leaf Spot. Brittany 2 has also exhibited the ability to suppress common weeds due to good seeding vigor. Brittany 2 contains endophyte which aids in insect resistance and stress tolerance. Brittany 2 shows at the top in the 2020 NTEP National Fineleaf Fescue trials for spring green up.

SUGGESTED USAGE

Brittany 2 can be used on its own for erosion control or as a low maintenance grass. This variety can be used in mixtures to aid in performance for shaded turf areas.

TURF ESTABLISHMENT GUIDELINES

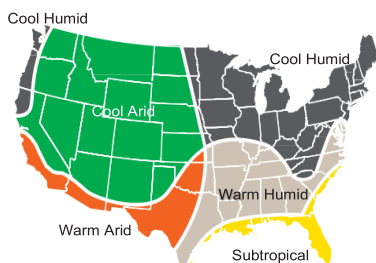

Adequate seed bed preparation is Important In new turf grass establishment as well as in overseeding applications. Check soil pH and apply LESCO starter fertilizer prior to seeding. Cool-season grasses germinate best in the 60° to 85° F (16° to 30° C) soil temperature range. Frequent light Irrigation and/or seed starter mulch is required for optimum germination. Germination should be visible within 21 days; complete turf establishment will take eight to twelve months to exhibit mature growth characteristics.

RECOMMENDED MAINTENANCE PRACTICES

Brittany 2 requires a minimum fertility program. Fall applications of fertilizer are recommended and mid-summer applications should be avoided. Minimize traffic in shaded areas. Low maintenance areas may require mowing once a year to remove seed heads.

ENVIRONMENTAL TOLERANCE

Brittany 2 is well adapted to areas in the cool humid and cool arid zones of the United States.

INGREDIENTS

100% Brittany 2 Chewings Fescue

SEEDING RATES

New Establishment

4-5 lb./1000 sq. ft.

Renovation

20-50% existing cover
3-4 lb./1000 sq. ft.

50-75% existing cover
2-3 lb./1000 sq. ft.

PACKAGING INFORMATION

50 lb. bag
#36-63-975
Woven Polypropylene Bags
