

DURABLE TALL FESCUE BLEND

TURF-TYPE TALL FESCUE

Highest Germination Rate | Advanced Testing | Unparalleled Standards

FEATURES

- Tall fescues selected for tiller and rhizome capabilities
- Self repair ability
- Dark green color
- Heat, drought, and wear tolerant
- Advanced generation cultivars
- Dense upright growth habit

AGRONOMIC CHARACTERISTICS

Durable Tall Fescue Blend will provide a turf that will tolerate drought, heat, shade, and traffic. The varieties in Durable Blend have the ability to tiller and fill in small areas of damage. These varieties also produce a limited amount of rhizomes when seeded at recommended rates, Durable Blend will form a dense, fine textured turf with excellent mowing qualities. The components of Durable Blend have been entered into the NTEP program and have shown excellent color, density, turf quality, wear tolerance and disease resistance.

SUGGESTED USAGE

Durable Blend is well suited on golf course roughs, home lawns, athletic fields, commercial turf areas, parks and playgrounds, particularly where irrigation is limited.

TURF ESTABLISHMENT GUIDELINES

Adequate seed bed preparation is important in new turf grass establishment as well as in overseeding applications. Check soil pH and apply LESCO starter fertilizer prior to seeding. Cool-season grasses germinate best in the 60° to 85° F (16° to 30° C) soil temperature range. Frequent light irrigation and/or seed starter mulch is required for optimum germination. Germination should be visible within 14 days; complete turf establishment will take two to six months to exhibit mature growth characteristics.

RECOMMENDED MAINTENANCE PRACTICES

Highest quality and durability are reached using moderate maintenance levels. Allow turf to establish prior to heavy use. Mowing height at 2-3" is recommended (lower mowing heights require higher maintenance).

ENVIRONMENTAL TOLERANCE

Durable Tall Fescue Blend is suitable for permanent turf in the cool humid and cool arid zones along with higher elevations in the warm arid and warm humid zones.

INGREDIENTS

100% Tall Fescue
(3 Varieties)

SEEDING RATES

New Establishment:

6-8 lb./1000 sq. ft.

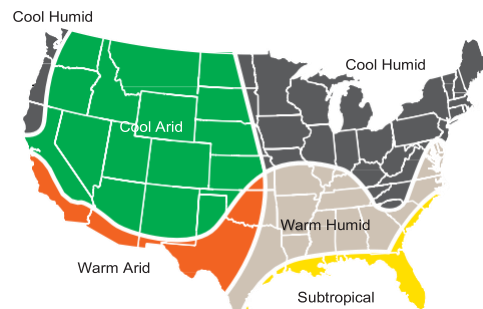

Renovation:

20-50% existing cover
5-7 lb./1000 sq. ft.

50-75% existing cover
4-6 lb./1000 sq. ft.

PACKAGING INFORMATION

50 lb. bag
#21-34-350
Woven Polypropylene Bags
