

# ELITE SOD BLEND

SOD QUALITY KENTUCKY BLUEGRASS BLEND

Highest Germination Rate | Advanced Testing | Unparalleled Standards

## FEATURES

- Low mow varieties
- Attractive dark green color
- Excellent vigor and density
- Broad adaptability
- Meets sod quality requirements
- Zero Crop | Zero Weed
- Triple Tested

## AGRONOMIC CHARACTERISTICS

All the components of Elite Sod Blend excel at a 1/2 Inch mowing height, making this a true fairway bluegrass blend. Elite Sod Blend maintains a deep and rich genetic color, even without fertilization. This blend features a high tensile strength. Elite Sod Blend offers a new level of excellence in turf production with excellent spring, summer, and fall density. The elite components of this blend exhibit resistance to leaf spot, rust, melting out, brown patch, and damping off. An added benefit to this blend is good drought tolerance for Kentucky bluegrass.

## SUGGESTED USAGE

Sod farms, golf course fairways, athletic fields, home lawns, commercial turf, parks and cemeteries are all suitable utilizations of Elite Sod Blend.

## TURF ESTABLISHMENT GUIDELINES

Adequate seed bed preparation is Important in new turf grass establishment as well as in overseeding applications. Check soil pH and apply LESCO® starter fertilizer prior to seeding. Cool-season grasses germinate best in the 60° to 85° F (16° to 30° C) soil temperature range. Frequent light irrigation and/or seed starter mulch is required for optimum germination. Germination should be visible within 3-4 weeks; complete turf establishment will take eight to twelve months to exhibit mature growth characteristics.

## RECOMMENDED MAINTENANCE PRACTICES

The preferred mowing height of Elite Sod Blend is 1.5 to 2 Inches. Elite Sod Blend responds well to moderate application rates of Nitrogen (2-3 lbs./1,000 sf per year). Maximum durability is achieved when turf is allowed to establish before heavy use.

## ENVIRONMENTAL TOLERANCE

Elite Sod Blend is best adapted to the cool arid and cool humid regions of the US.

## INGREDIENTS

100% Kentucky Bluegrass  
(4 Elite Sod Quality Varieties)

## SEEDING RATES

### New Establishment:

50-100 lb./acre

## PACKAGING INFORMATION

50 lb. bag  
#24-14-202  
Woven Polypropylene Bags  
Oregon Certified Blend
