

EVOLUTION

TURF-TYPE PERENNIAL RYEGRASS: BLUE TAG CERTIFIED

Highest Germination Rate | Advanced Testing | Unparalleled Standards

FEATURES

- Medium dark green genetic color
- Excellent Gray Leaf Spot resistance
- Top NTEP performer
- Dense growth habit
- Fine leaf texture
- Low growth habit

AGRONOMIC CHARACTERISTICS

Evolution has top turf quality ratings in several NTEP locations. This premium variety has a low growth habit and excellent mowing quality. Evolution shows excellent competition against poa annua, and is traffic tolerant. Evolution has a medium dark green color, fine texture and excellent density. This variety contains endophytes which add to insect resistance. Evolution is gray leaf spot resistant and is also resistant to Brown Patch. The original germplasm was selected jointly by Rutgers and Novel Ag.

SUGGESTED USAGE

Golf course tees, fairways and roughs, home lawns, athletic fields, commercial turf areas, parks and playgrounds.

TURF ESTABLISHMENT GUIDELINES

Adequate seed bed preparation is important in new turf grass establishment as well as in overseeding applications. Check soil pH and apply LESCO starter fertilizer prior to seeding. Cool-season grasses germinate best in the 60° to 85° F (16° to 30° C) soil temperature range. Frequent light irrigation and/or seed starter mulch is required for optimum germination. Germination should be visible within 14 days; complete turf establishment will take two to six months to exhibit mature growth characteristics.

RECOMMENDED MAINTENANCE PRACTICES

Highest quality and durability are reached using moderate maintenance levels. Allow turf to establish prior to heavy use. Mowing height at 1 1/2" to 2 1/2" is recommended (lower mowing heights require higher maintenance).

ENVIRONMENTAL TOLERANCE

Evolution is best suited in cool humid and cool arid zones of the United States for permanent turf establishment. Evolution is also suited for overseeding warm season grasses in the warm humid and warm arid zones.

INGREDIENTS

100% Evolution Perennial Ryegrass

SEEDING RATES

New Establishment

4-6 lb./1000 sq. ft.

Renovation

20-50% existing cover
3-5 lb./1000 sq. ft.

50-75% existing cover
2-4 lb./1000 sq. ft.

PACKAGING INFORMATION

50 lb. bag Blue Tag Certified
#38-889-82
Woven Polypropylene Bags
