

MILLENNIUM TALL FESCUE BLEND

TURF-TYPE TALL FESCUE

Highest Germination Rate | Advanced Testing | Unparalleled Standards

FEATURES

- Advanced generation cultivars
- 4th Millennium Tall Fescue included
- Heat and drought tolerant
- Wear tolerance
- Dense upright growth habit

AGRONOMIC CHARACTERISTICS

Millennium Tall Fescue Blend will provide a durable turf that will tolerate drought, heat, shade, and traffic. The premium varieties featuring 4th Millennium contain endophytes to increase resistance to surface feeding insects. When seeded at recommended rates, Millennium Tall Fescue Blend will form a dense, fine textured turf with excellent mowing qualities. Blend components have undergone turf trials to screen for desirable traits including brown patch resistance. Millennium Tall Fescue blend has tillering ability which enables self-repair for small damaged areas of turf.

SUGGESTED USAGE

Millennium Tall Fescue Blend is suitable for golf course roughs, home lawns, athletic fields, commercial turf areas, parks and playgrounds; particularly where irrigation is limited.

TURF ESTABLISHMENT GUIDELINES

Adequate seed bed preparation is Important In new turf grass establishment as well as in overseeding applications. Check soil pH and apply LESCO starter fertilizer prior to seeding. Cool-season grasses germinate best in the 60° to 85° F (16° to 30° C) soil temperature range. Frequent light irrigation and/or seed starter mulch is required for optimum germination. Germination should be visible within 14 days; complete turf establishment will take two to six months to exhibit mature growth characteristics.

RECOMMENDED MAINTENANCE PRACTICES

Highest quality and durability are reached using moderate maintenance levels. Allow turf to establish prior to heavy use. Mowing height at 2" to 3" is recommended (lower mowing heights require higher maintenance).

ENVIRONMENTAL TOLERANCE

Millennium Tall Fescue Blend is suitable for permanent turf in the warm humid, warm arid, cool humid, and cool arid zones of the US.

INGREDIENTS

100% Tall Fescue
(3 Varieties Including 4th Millennium)

SEEDING RATES

New Establishment:
6-8 lb./1000 sq. ft.

Renovation:
20-50% existing cover
5-7 lb./1000 sq. ft.

50-75% existing cover
4-6 lb./1000 sq. ft.

PACKAGING INFORMATION

50 lb. bag
#20-42-653
Woven Polypropylene Bags
