

# PPJ BLEND

TURF-TYPE PERENNIAL RYEGRASS AND INTERMEDIATE RYEGRASS

## Highest Germination Rate | Advanced Testing | Unparalleled Standards

#### **FEATURES**

- Improved turf-type ryegrass cultivars
- · Good spring transitioning
- · Fine texture, excellent mowing quality
- Dark green color
- · Excellent traffic tolerance
- Good disease resistance

## **AGRONOMIC CHARACTERISTICS**

PPJ Blend contains two premium turf-type perennial ryegrass cultivars plus one advanced intermediate ryegrass cultivar. PPJ Blend will provide excellent turf quality as well as wear tolerance. With increased density and an upright growth habit, PPJ Blend shows improved mowing quality. This product contains endophytes for increased resistance to surface feeding insects and better stress tolerance. PPJ Blend will establish quickly and transition quickly. Blend components have performed well under irrigation using effluent water.

## SUGGESTED USAGE

Southern winter overseeding of golf course tees, fairways and roughs, home lawns, athletic fields, commercial turf areas, parks and playgrounds.

### TURF ESTABLISHMENT GUIDELINES

Adequate seed bed preparation is Important In new turf grass establishment as well as in overseeding applications. Check soil pH and apply LESCO starter fertilizer prior to seeding. Cool-season grasses germinate best in the 60° to 85° F (16° to 30° C) soil temperature range. Frequent light Irrigation and/or seed starter mulch is required for optimum germination. Germination should be visible within 14 days; complete turf establishment will take two to three months to exhibit mature growth characteristics.

## **RECOMMENDED MAINTENANCE PRACTICES**

Highest quality and durability are reached using moderate maintenance levels. Allow turf to establish prior to heavy use. Mowing height at 1 1/2" to 2 1/2" is recommended (lower mowing heights require higher maintenance).

## **ENVIRONMENTAL TOLERANCE**

PPJ Blend is adapted throughout the warm humid and warm arid zones for overseeding dormant warm-season grasses in the winter.

## **INGREDIENTS**

70% Perennial Ryegrass (2 Varieties) 30% Intermediate Ryegrass

#### **SEEDING RATES**

**New Overseeding Establishment:** 10-15 lb./1000 sq. ft.

## **PACKAGING INFORMATION**

50 lb. bag #38-882-62 Woven Polypropylene Bags
