

SW COLLEGE BLEND

TURF-TYPE PERENNIAL RYEGRASS

Highest Germination Rate | Advanced Testing | Unparalleled Standards

FEATURES

- Advanced generation cultivars
- Fine texture, excellent mowing quality
- Dark green color
- Excellent traffic tolerance
- Good disease resistance
- Improved density at lower mowing heights

AGRONOMIC CHARACTERISTICS

SW College Blend contains three advanced generation cultivars of perennial ryegrass. This will provide high turf quality as well as good wear tolerance. With increased density and an upright growth habit, SW College Blend shows good mowing characteristics. Varieties used in SW College Blend have performed well under irrigation using effluent water.

SUGGESTED USAGE

Southern winter overseeding of golf course tees, fairways and roughs, home lawns, athletic fields, commercial turf areas, parks and playgrounds.

TURF ESTABLISHMENT GUIDELINES

Adequate seed bed preparation is Important In new turf grass establishment as well as in overseeding applications. Check soil pH and apply LESCO starter fertilizer prior to seeding. Cool-season grasses germinate best in the 60° to 85° F (16° to 30° C) soil temperature range. Frequent light Irrigation and/or seed starter mulch is required for optimum germination. Germination should be visible within 14 days; complete turf establishment will take two to three months to exhibit mature growth characteristics.

RECOMMENDED MAINTENANCE PRACTICES

Highest quality and durability are reached using moderate maintenance levels. Allow turf to establish prior to heavy use. Mowing height at 1 ½ to 2 ½" is recommended (lower mowing heights require higher maintenance). Mowing heights as low as ½ inch have been maintained with very high density and quality in golf fairways.

ENVIRONMENTAL TOLERANCE

SW College Blend is adapted throughout the warm humid and warm arid zones for overseeding dormant warm-season grasses in the winter. This mix was particularly designed to be a top performer in the southwest US.

INGREDIENTS

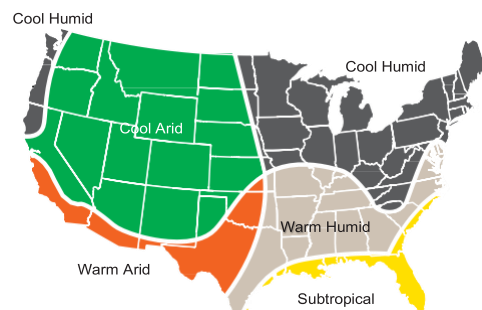

100% Perennial Ryegrass
3 of the following varieties:
Align/2 | Evolution | Evolve

SEEDING RATES

New Overseeding Establishment:
10-15 lb./1000 sq. ft.

PACKAGING INFORMATION

50 lb. bag
#28-837-82
1000 lb. bag
#28-837-28
Woven Polypropylene Bags
