

# OVERSEEDING EAGLE BLEND

## TURF-TYPE PERENNIAL RYEGRASS BLEND

**Highest Germination Rate | Advanced Testing | Unparalleled Standards**

### FEATURES

- Advanced generation cultivars
- Good spring transitioning
- Fine texture, excellent mowing quality
- Dark green color
- Excellent traffic tolerance
- Very good disease resistance

### AGRONOMIC CHARACTERISTICS

Overseeding Eagle Blend contains three advanced generation cultivars of perennial ryegrass. This will provide high turf quality as well as good wear tolerance. With increased density and an upright growth habit, Overseeding Eagle shows good mowing characteristics. This blend will transition well in the spring. Varieties used in Overseeding Eagle have performed well under irrigation using effluent water.

### SUGGESTED USAGE

Southern winter overseeding of golf course tees, fairways and roughs, home lawns, athletic fields, commercial turf areas, parks and playgrounds.

### TURF ESTABLISHMENT GUIDELINES

Adequate seed bed preparation is important in new turf grass establishment as well as in overseeding applications. Check soil pH and apply LESCO starter fertilizer prior to seeding. Cool-season grasses germinate best in the 60° to 85° F (16° to 30° C) soil temperature range. Frequent light irrigation and/or seed starter mulch is required for optimum germination. Germination should be visible within 14 days; complete turf establishment will take two to three months to exhibit mature growth characteristics.

### RECOMMENDED MAINTENANCE PRACTICES

Highest quality and durability are reached using moderate maintenance levels. Allow turf to establish prior to heavy use. Mowing height at 1 1/2" to 2 1/2" is recommended (lower mowing heights require higher maintenance).

### ENVIRONMENTAL TOLERANCE

Overseeding Eagle is adapted throughout the warm humid and warm arid zones for overseeding dormant warm-season grasses in the winter.

### INGREDIENTS

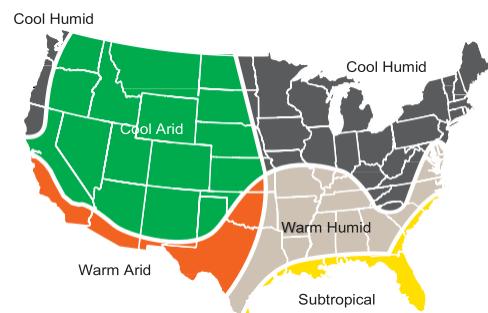

100% Turf-Type Perennial Ryegrass  
(3 Varieties)

### SEEDING RATES

**New Overseeding Establishment:**  
10-15 lb./1000 sq. ft.

### PACKAGING INFORMATION

50 lb. bag  
#32-52-950  
Woven Polypropylene Bags

Exclusively at
