

LESCO-WET PLUS SOIL WETTING AGENT

SPECIALTY | 113575 | 113578

PRODUCT OVERVIEW

LESCO-Wet Plus™ is a soil wetting agent that improves soil moisture uniformity and wetting in soils that are susceptible to hydrophobicity or Localized Dry Spot (LDS). This highly effective EO/PO block co-polymer wetting agent is ideal for turf areas like golf course putting greens, tees, fairways and athletic fields.

FEATURES & BENEFITS

- Upsurges water infiltration and penetration in hydrophobic soils
- Increases water-use efficiency
- Decreases hydrophobicity and localized dry spots
- NPE-Free

BEST PRACTICES

LESCO-Wet Plus is a soil moisture management product that **MUST** make soil contact to be effective. Watering after application is not required when applied by injection irrigation. If not applied by an irrigation system, follow the treatment with at least ¼ inch of water.

LESCO-Wet Plus treatments may be made approximately once a month. Treatments should start prior to or when signs of stress such as yellowing, curling leaves begin to show or as water is observed pooling on the surface.

The solution may be applied via an in-ground irrigation system, through a spray bar on a tractor, or via hand-held sprayers.

Fine Turf, Lawns, Fairways, Greens, Tees, and Athletic Fields:

First application: 8 to 16 ounces of LESCO-Wet Plus mixed in a minimum of 2 gallons of water for every 1,000 square feet of turf or soil that will be treated.

Monthly applications: If symptoms have not reappeared, 4 to 8 ounces of LESCO in a minimum of 2 gallons of water for every 1,000 square feet of turf or soil.

DO NOT PRE-MIX with pesticides or other adjuvants before mixing with water.

May be applied with nutrients or fertilizers if jar test results indicate compatibility.

If the user does not have experience with the mixture being applied, perform a jar test using the order and amounts in the mixture and perform a phytotoxicity test to ensure crop safety.

ACTIVE INGREDIENTS

59.4%	...	Ethylene oxide-propylene oxide copolymer
10.0%	Propylene glycol
6.6%	Alcohols, C9-11, ethoxylated
24.0%	Inert ingredients (water)
