

GENERAL DESCRIPTION

LESCOFLO ULTRA Tablets are a mixture of highly active, non-ionic surfactants. This product alleviates problems associated with localized dry spots (LDS) from hydrophobic soils on all turfgrass areas. This product also increases the rate and depth of water penetration as well as reducing subsequent irrigation requirements for up to 120 days. LESCOFLO ULTRA Tablets can be used alone to treat small LDS areas or to supplement broadcast applications of liquid LESCOFLO. The tablets can also be used on newly established turf, ornamentals, annuals or perennials.

DIRECTIONS FOR USE

LESCOFLO ULTRA Tablets fit most types of hose spray applicators. If using the tablets exclusively, apply before or at the start of the growing season. LESCOFLO ULTRA Tablets can also be used curatively to relieve plant stress due to hydrophobic soils any time of the year. When used at the highest application rate and in certain weather and soil conditions, a low level of phytotoxicity may occur. In a hose-end applicator, insert one LESCOFLO ULTRA Tablet and syringe for 3-5 minutes per 1,000 sq ft of turf in areas exhibiting symptoms of LDS as a curative treatment. Treat affected areas weekly for 3-4 weeks, then biweekly or as needed when hydrophobic soil conditions appear. One LESCOFLO ULTRA Tablet will treat from two to three golf greens, or up to 10,000-15,000 sq ft of turf. The Tablet will dissolve and disperse fully in approximately 30-40 minutes utilizing a 1 inch hose with up to 100 psi. The total water volume applied with the use of one LESCOFLO ULTRA Tablet is determined by water pressure, temperature and flow rate. Local environmental conditions, soil type, and thatch depth should also be considered in order to optimize LESCOFLO ULTRA Tablet applications.

APPLICATION RATES

For preventative application on areas with a history of LDS apply 1 tablet over 1,500-3,000 sq ft once per week for the first two weeks. Then treat as needed throughout the growing season. For existing in-season problems, apply at the same rate as the preventative treatment. Water in thoroughly after treatment to wash LESCOFLO ULTRA through the thatch layer into the soil. Repeat application as necessary.
