Washington, NJ 07882

This product is a highly effective solution for preventing foraging and entry damage caused by **deer, elk and moose** when used according to the following directions. **1:** Shake container well before using. **2:** Mix one part concentrate with nine parts water (13 ounces will make one gallon of product) into an empty garden sprayer, making sure that it has been thoroughly cleaned out from any prior use. **3:** Apply a fine mist to dens, tunnels, entries and around plants that need protection. When using near edible crops, apply around plants or as a perimeter application, making sure not to treat edible plant material. **4:** Allow 20 minutes for the product to dry before watering of any kind. **5:** Repeat application as needed, usually every 30 days.

NOTE: Due to possible allergic reaction to one or more of the ingredients used to make this product, do not apply to plants that are grown for human or animal consumption. When applying, ensure that the product does not contact food plants. It may, however, be used on dormant fruit and nut trees. This product works by smell, taste and feel.

Storage and Disposal

Store at room temperature. When finished with contents, dispose of any unused product according to local regulation, rinse container and recycle.

Precautionary Statement

To reduce contact with skin, always wear gloves when handling. In case of eye contact or prolonged exposure to skin, flush thoroughly with water to reduce irritation. If swallowed, drink a glass of water.

If for any reason, you are not 100% satisfied, Messinas will refund the suggested retail price or replace this product within thirty days of the date of purchase. Messinas will not be liable for any damage, direct or indirect. Refund or replacement of product is our only obligation. To request a refund, mail the original bar code from this package along with a copy of your receipt within 30 days of purchase to the address on this label. Limit one return per household.
