PT stands for Pressurized Technology. But with our portfolio, it stands for so much more.

Treat a wide range of pests with only two letters.

As the company that pioneered pressurized technology for pest control, BASF is the name pest management professionals trust. With the PT® Brand Pressurized Insecticides portfolio, pest management professionals can be confident that they'll kill a wide range of pests effectively, conveniently and cost-efficiently. PT means having the right solution. For the right location. At the right time.

Each of our innovative PT aerosol products are premixed, ready-to-use and equipped with a high-precision application system that makes them easy to deliver. Pest management professionals can directly target the key harborage areas where insects eat, rest and reproduce — without extra equipment or cleanup. Our pressurized technology can provide quick relief in key areas of infestation, providing customers worry-free peace of mind.

Work Smarter with PT + System III®

The BASF aerosol lineup works even more effectively and efficiently when paired with the System III. The System III is designed to make pest management professionals even better at what they do with precise, easy-to-deliver applications of compatible PT Brand products into the most hard-to-reach areas. Plus, its modern look elevates the professional image of PMPs while the state-of-the-art design increases the practicality and profitability of compatible PT pressurized insecticides.

To learn more about the System III and all of the available PT brands, visit pestcontrol.basf.us.

Always read and follow label directions.

Contact

Pressurized contact insecticides enhance inspections with excellent flushing action and knockdown. Their non-residual nature even makes them great choices for everyday use within sensitive accounts, including commercial kitchens. BASF is proud to have assembled one of the most effective and popular collections of pressurized contact insecticides.

Pressurized Contact Insecticide

A.I. 0.5% Pyrethrins, 4% PBO Packaged 12 x 18 oz

- Fast drying formulation
- Excellent for space treatment
- Registered for use in food handling areas

PT® 565 Plus XLO Pressurized Contact Insecticide

A.I. 0.5% Pyrethrins, 1% PBO, 1% MGK-264 Packaged 12 x 20 oz

- Excellent for use during
- inspections Registered for use in food handling areas

Non-Repellent

Non-Repellent insecticides are undetectable to pests, do not scatter or disperse them throughout an account, and are excellent choices to use in conjunction with baits as they do not affect palatability. Excellent for use in rotation for resistance management, these non-repellents are staples in the fight against a broad range of pests.

PT® Alpine® Pressurized Insecticide

A.I. 0.5% Dinotefuran Packaged 12 x 17.5 oz

- Reduced risk non-repellent aerosol*
