

High Quality
Locally Made

DIRECTIONS FOR USE

For best results, remove all loose snow and slush from concrete surfaces. Apply ¼-1/2 cup of PREMIUM GRADE CONTRACTOR ICE MELT per sq. yard. If vehicles are stuck spread a portion of deicer in path of tires to help gain traction. Melting will begin almost immediately and continue for longer than ordinary rock salt productions. Thick accumulation of ice may require additional application. For longer lasting usage, keep package closed when not in use.

WARNING:

KEEP OUT OF REACH OF CHILDREN. Over time, ice-melting agents may be harmful when used extensively and/or when over applied to concrete surfaces, metal surfaces. R masonry. Poorly constructed porous concrete and mortar joints between brick and flagstone. Free/Thaw cycles can cause concrete to shift and move. PREMIUM GRAD ECONTRACTOR ICE MELT will cause less damage during these cycles.

FIRST AID:

Eye irritant in case of eye contact, flus with water for longer than 15 minutes. If irritation persist seek medical attention. Prolonged skin contact may cause dryness and irritation. Wash thoroughly. If large doses are swallow ed, gastrointestinal irritation.

NO WARRANTY:

The Manufacturer or Seller is not liable for any injury or damage caused by this product due to misuse, mishandling, or any other application not specifically described in this label.

CONTAINS:	CAS #:
-Sodium Chloride	7647-14-5
-Calcium Chloride	10043-52-4
-Magnesium Chloride Hexahydrate	779-18-6
