## ENVIRONMENTAL HAZARDS

To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, gutters, or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash pesticide off the treatment area. Sweeping any product that lands on a driveway, sidewalk, or street, back onto the treated area of the lawn or garden will help to prevent run off to water bodies or drainage systems.

## DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Do not apply this product in a way that will contact any person or pet, either directly or through drift. Keep people and pets out of the area during application. Do not allow people or pets to enter the treated area until dusts have settled.

For Use on Established Turfs, including sensitive species such as Centipede and St. Augustine, except Desirable Clovers, Bent, Dichondra and Carpet Grass. Not for use on turf being grown for sale or other commercial use as sod, or for commercial seed production, or for research purpose.

For Use on Established Turfs, including sensitive species such as Centipede and St. Augustine, except Desirable Clovers, Bent, Dichondra and Carpet Grass.

EFFECTIVE APPLICATION OF REPAIR BROAD SPECTRUM WEED AND FEED FOR MOST WEED LEAVES SHOULD BE DAMP FROM RAIN, DEW OR SPRINKLING TO ALLOW THE PRODUCT TO STICK TO THE LEAF. A LACK OF MOISTURE ON THE WEED LEAVES WILL REDUCE WEED CONTROL.

## WHAT TO LOOK FOR:

Repair Broad Spectrum Weed and Feed, properly applied, first reduces or eliminates the formation of most flower heads and the seeds they produce and then attacks and removes the mature weed itself. Look for an absence or stunting of seed heads in flowering weeds such as clover or dandelions. Some weeds may also show twisting stems and dwarfed appearance with curling of the leaves.

Repair Broad Spectrum Weed and Feed is designed with an excellent turf nutrient diet to allow grass plants to gradually fill in the areas around dying weeds. This allows for a more natural recovery of the turf and minimizes reinfestations of bare areas by wind-borne weed seeds. Applied as directed, the rich green color will not be affected.

UNDER NORMAL GROWING CONDITIONS, WEED KILL SHOULD BE COMPLETE WITHIN 21 TO 35 DAYS

## SPREADER SETTINGS

Spreader	Rate: 3.5#/M	Pattern Setting	Width
Earthway Broadcast	11	—	8
Lely	4 1/2	III – B	42
Lesco Broadcast	D 1/2	0.0	11
Prizelawn Broadcast	4 1/4	A	7
Scotts Broadcast	1	5	10
Spyker	3	—	9
Vicon	29	—	4
Cyclone Broadcast	3 1/4	—	5

**Important:** These are approximate settings. Age and condition of your spreader can cause wide variation. Be sure to calibrate your spreader with each application.

## WHEN TO APPLY:

Apply any time weeds are actively growing and temperature is above 60°F. Do not apply when turf is under stress from heat, excessive moisture or drought. Control is quicker and more complete if applied in Spring prior to weed flower formation. Control is slower if applied when weather is cool. On new seeded areas, wait until grass has been cut two or three times before using. Delay planting new grass for at least three weeks as the active ingredients may temporarily inhibit seed germination.

## HOW TO APPLY:

EFFECTIVE APPLICATION OF REPAIR BROAD SPECTRUM WEED AND FEED REQUIRES THE WEED LEAVES TO BE DAMP FROM RAIN, DEW OR SPRINKLING PRIOR TO APPLICATION. A LACK OF MOISTURE ON THE WEED LEAVES WILL REDUCE WEED CONTROL. Apply evenly over the entire lawn at the rate of 3.5 lbs./1,000 sq. ft. Rain or heavy sprinkling with 24 hours of application will temporarily delay weed control. Mowing within 24 hours may reduce effectiveness. Wait at least 45 days before making a second application. Do not make more than two applications per year.

Use the suggested spreader settings as a guide being sure to check your spreader at the beginning of the application. Adjust your spreader if necessary. Be sure to shut off spreader while turning or stopping to prevent accidental over application and burning of grass. SPECIAL NOTE: Repair Broad Spectrum Weed And Feed is designed to be absorbed by plant leaves. Accidental application of this product to the foliage of ornamentals such as roses may result in the loss of flowers. For this reason, extra care should be taken when using a broadcast or rotary type spreader.

## STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

**PESTICIDE STORAGE:** Store in original container in a locked storage area. Keep container closed and away from food, feedstuffs and domestic water supplies.

**PESTICIDE DISPOSAL:** Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixtures or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

**CONTAINER DISPOSAL:** Nonrefillable container. Do not reuse or refill this container. If empty: Place in trash or offer for recycling if available. If partly filled: Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.
