

SUNNY LAWN SEED MIXTURE

PREMIUM GRASS SEED

Drought
tolerant

Fast
establishment

Low
maintenance

Wear
tolerant

Wide
adaptability

Sunny Lawn Seed Mix is designed to provide a quality turf requiring normal to low maintenance. It is best used where conditions provide full sun to light shade. The perennial ryegrass can germinate and establish quickly providing protection for the slower germinating bluegrasses along with improved disease resistance. The Kentucky bluegrasses provide excellent turf density and recovery from stressors. Drought avoidant tall fescue make this mix less water demanding and enhanced wear tolerance. All the grasses used in this mixture blend nicely in both color and leaf texture. This mixture is proudly approved by the Turfgrass Water Conservation Alliance.

Recommended Use: Sunny Lawn Seed Mix can be used successfully on a variety of soils existing in most sites, including home lawns, commercial properties, parks, schools and other turf area receiving normal to low maintenance.

COMPOSITION

30% Sun Hawk Perennial Ryegrass
20% Amity Turf Type Tall Fescue
