

# TST CONTOUR BLADES

*Cutting curves with a straight blade can be challenging and potentially dangerous. TST Contour Blades are engineered specifically for cutting curves and sink openings.*

- Concave core lets the blade naturally curve while cutting.
- Side protection segments keep the blade cutting freely and prevent binding.
- Highest quality raw materials and engineering creates fast smooth cuts and long life.
- The **Turbo Rim Blade** is designed for granite, engineered stone, quartzite and concrete.
- The **Electroplated Blade** is designed for limestone, marble and travertine. It also works really well on porcelain.

**ALL NATURAL STONE**

**MARBLE**

**CERAMIC TILE**

**PORCELAIN TILE**

Part Number	Size/Description
TSTTCB-5	5" x .100" x 7/8"-5/8", Contour Turbo Rim Blade
TSTECB-5	5" x 0.098" x 7/8", Electroplated Contour Blade, side protection
