

**The industry's only product line of soft baits to reduce fertility in rodents.**  
This breakthrough technology provides the ability to target your rodent population where it starts by restricting fertility.

**Get Evolve™**  
and take control!

**EVOLVE™**

BY SENESTECH, THE LEADER IN FERTILITY CONTROL  
TO MANAGE ANIMAL PEST POPULATIONS

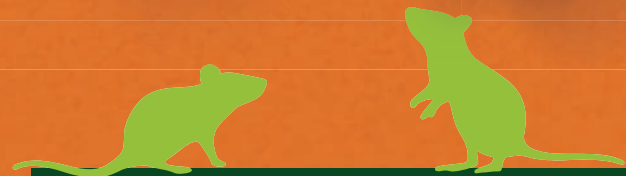

# Evolve™ is a product line of soft bait contraceptives for rodents developed by SenesTech. The active ingredient, cottonseed oil, inhibits fertility to reduce their population.

## Evolve™ soft bait's key benefits include:

- **Effective fertility control** – The active ingredient in Evolve products effectively reduces or eliminates fertility in rodents which reduces their population.
- **Long-term solution** – Affects the population beginning after one to two breeding cycles (four to six weeks), resulting in reduced pregnancies and less pups born.
- **User-friendly format** – The soft bait format is designed to be familiar and convenient for professionals and consumers alike to deploy.
- **Highly palatable** – Contraceptive bait is attractive and palatable to rodents so that they continue to consume it, bringing greater results.
- **Addresses infestation source** – Designed to address pest infestations at the source, by reducing the birth rate.
- **Integrates with pest management programs** – Works in tandem with traditional rodent control products to provide long-term solutions.
- **Cost competitive with rodenticide alternatives** – Cost effective for pest management programs.

Soft bait for rats

Soft bait for mice

Add Evolve™ product line of soft baits to your IPM program and take control of your rodent population.
