Pot Plants	1.5-2.0 g/l (kg/m ³)	2.0-4.5 g/l (kg/m ³)
Bedding plants	1.0-2.0 g/l (kg/m ³)	2.5-4.5 g/l (kg/m ³)
Cutflowers	3.0-5.0 kg/100m ²	5.0-8.0 kg/100m ²
Forestry plants - nursery	1.0-2.0 g/l (kg/m ³)	3.0-4.0 g/l (kg/m ³)

For a full fertilization package use Micromax Premium; Item:8903.

Attention

Rates are based on non fertilized substrates. Please be aware that recommended rates are general recommendations. Specific situations such as use in tunnels, greenhouses, or specific climate conditions require adjustments. We don't recommend this

Characteristics

Longevity

3-4 Months

Granule size

2.0-4.5mm

product for dibbling and/or autumn, winter pottings. Contact Everris for more detailed advice.

Trial first on a small scale before rate, application or other changes in your cultural practices are implemented.

As circumstances can differ and as the application of our products is beyond our control, Everris cannot be made responsible for any negative results.

Osmocote is a controlled release fertilizer with a high NPK content. The granules are fully coated and contain NPK. Osmocote has a pre-defined longevity and can be used in a broad range of situations.
