

Pac-Low

Plant Growth Regulator

Pac-Low is a systemic plant growth regulator that prevents non-residential turf-grass from growing for 6-8 weeks after applying the product, reducing the need to mow. Improves the performance of fertilizer that is applied for up to 12 weeks, reduces scalping, and even controls for the development of some grasses after prolonged use.

Features & Benefits

- Better ball playability on hybrid Bermuda grass due to increased turf density and tighter-knit turf areas.
- Suppression of Poa annua by reducing its growth and competitiveness.

Active Ingredient

Paclobutrazol 22.3%

Application Sites

Athletic Fields and Non-Residential grass

Effective Against

Poa annua, Bermuda grass, Bentgrass and perennial Rye-grass Fairways, Tees, Roughs, Trees, and Ornamentals

Packaging

4 x 1 Gallon/case (48 cs/pallet)
