

# First Aid

**According to OSHA**, “it is a requirement that employees be given a safe and healthy workplace that is reasonably free of occupational hazards. Employers are required to provide medical and first aid personnel and supplies commensurate with the hazards of the workplace.” In addition to having a first aid kit onsite, OSHA recommends “a first aid program that is part of a comprehensive safety and health management system that includes essential elements; management leadership and employee involvement, worksite analysis, hazard prevention and control and safety and health training.”

## Single Person First Aid Kit
